Any way to produce a long page for scrolling screen capture? From a multi-page post. Maybe a switch on the url like /all or something? I'm trying to capture something for reference when I'm offline.

FWIW

Google Search

Wouldn't it be great if there were a portable document format?

Already got a scrolling screen capture that does pdf, lets you copy to clipboard, etc. and can capture each page as separate pdf. What would be nice is to grab the whole thread as one pdf. 1st world problem...
